

CBU 300 + IBC 150 + L 180 + C 2155

PACKAGING OF TABLETS IN BOTTLES AND CARTONS. RELIABLE, ACCURATE, AND SEAMLESS.

Efficient bottle unscrambling,
cleaning, and forwarding

Wad feeding
Optional: monitoring of presence and correct insertion

Capping system
Scalable performance with up to three capping heads

Various forms of application:
full wrap-around, three-sided, or front/back labeling

Intuitively correct operation
with SmartControl, apps covering all production steps

Desiccant feeding
Optional: enclosed system for up to three portions per bottle

Tablet counting and feeding system
Up to four counting modules for added bottle and counting capacity
Optional: single tablet reject function

Track & Trace by Uhlmann

Reliable packaging
of bottles and other inserts in cartons

PACKAGING SOLIDS IN BOTTLES: HIGH-PRECISION ACCURACY

Bottle unscrambling and cleaning, no undercounts of solid dose products, bottle filling, capping, labeling and marking, and carton packaging: the bottle line incorporates all these steps in one continuous, productive process including Track & Trace by Uhlmann. This starts with the Cremer Bottle Unscrambler CBU 300, which is followed by the Bottle line IBC 150, Labeler L 180, and Cartoner C 2155.

UHLMANN LIVE gives you an insight into the integrated line solution, which includes a new single tablet rejection function (patent pending). This already inspects the tablets in the counting system, identifies damaged products, and eliminates them individually, thus minimizing waste.

Output data at a glance:

CBU 300 max. 300 bottles/min.

IBC 150 max. 150 bottles/min.
max. 24,000 products/min.

L 180 max. 180 bottles/min. (round)
max. 165 bottles/min. (rectangular, oval)

C 2155 max. 150 cartons/min.
